WHO WE ARE

At A-TEK, we’re experts in managing the data that drives federal missions. A woman-owned small business with 16 locations nationwide, we’re a 20-year partner to U.S. government agencies. A-TEK delivers science and IT services and solutions in support of public health, law enforcement, national security, and scientific missions.

WHY WE’RE DIFFERENT

We leverage technology for solving data intensive problems. Our passion lies in helping customers uncover hidden insights that support missions to protect the American public.

That passion shapes A-TEK’s core values: honesty, integrity, collaboration, performance excellence, innovation, and developing our people. We lead a purpose-driven culture and actively nurture A-TEK’s diverse pool of talent.

This devotion to quality and growth lets us stay agile, innovative, and responsive to our customers’ evolving needs. We infuse these values into every A-TEK solution.

"Our problem became your challenge. Your challenge soon became solutions. Words cannot express enough thanks to Team A-TEK for what you have done to help us develop and manage our Facility Information Management System powered by ARCHIBUS. You have demonstrated unwavering ability in providing excellence in the services you provide. Thank you for your continued efforts to address our needs and achieve our goals."

Workplace Optimization

CHALLENGES

The federal government faces complex challenges related to its real property portfolio. Agencies invest significant financial resources in owned and leased real estate assets. Therefore, they require the right information to make the most informed decisions for maximizing returns and complying with government mandates.

The Office of Management and Budget (OMB) requires agencies to optimize federal real property use and identify opportunities to reduce cost. They can do this by eliminating excess properties, aligning the real estate portfolio to agency need and addressing regulatory compliance and transparency requirements.
OUR SOLUTION

A-TEK has significant experience helping the federal government manage and operate their portfolio to highlight opportunities. We leverage commercial-off-the-shelf solutions to help our customers automate many routine processes, create defensible reports, and increase rent chargeback collection – while also providing improved visibility into operational spend and total cost of occupancy by tracking and managing what’s happening at each site.

We offer a proven framework that helps our clients identify their pain points and rationalize a go-forward strategy. We accomplish this through a collaborative process that follows a logical progression of evaluation, insight, alignment, and enablement.

A-TEK works closely with select industry-leading technology partners to bring the off-the-shelf Integrated Workplace Management System (IWMS) solutions to address our customers’ unique and dynamic business needs.

ARCHIBUS

ARCHIBUS is a scalable suite of software products that maximizes return on infrastructure investment. A-TEK’s team of experienced consultants bring real-world facilities and real estate experience to ARCHIBUS implementation and management.

ARCHIBUS BENEFITS

The ARCHIBUS Technology Platform:

- Universal Access – Run and access the system from anywhere
- Mobile Capabilities – Support a workforce on the move
- Performance Metrics – Conduct robust analysis and receive alerts
- GIS Capabilities – ESRI, Google Maps, and more
- A Built-In Workflow Engine – Automate routine processes
- E-mail Integration – Communicate more effectively
- Document Management – Track history

ARCHIBUS Product Platform:

- Integrated applications to reduce redundant systems
- Open connectivity to reduce systems and processes
- Linked design and geospatial systems to provide visual analysis
- Open data schema to avoid re-invention
- Configurable interface to encourage focus and efficiency
- Role-based menus to comply with security requirements
- Process-based functionality to build workflows

Benefits of A-TEK’s Work Optimization Solution

- We offer a team of seasoned consultants to help define and promote strategic goals and drive quantifiable results
- Our proven framework helps our customers illuminate challenge areas and develop strategies to address them
- We employ a predefined toolkit that shortens the time-to-value for our engagements by leveraging templates and best practices
