**FACILITIES  
OPTIMIZATION**

## **AN ARCHIBUS BUSINESS PARTNER**

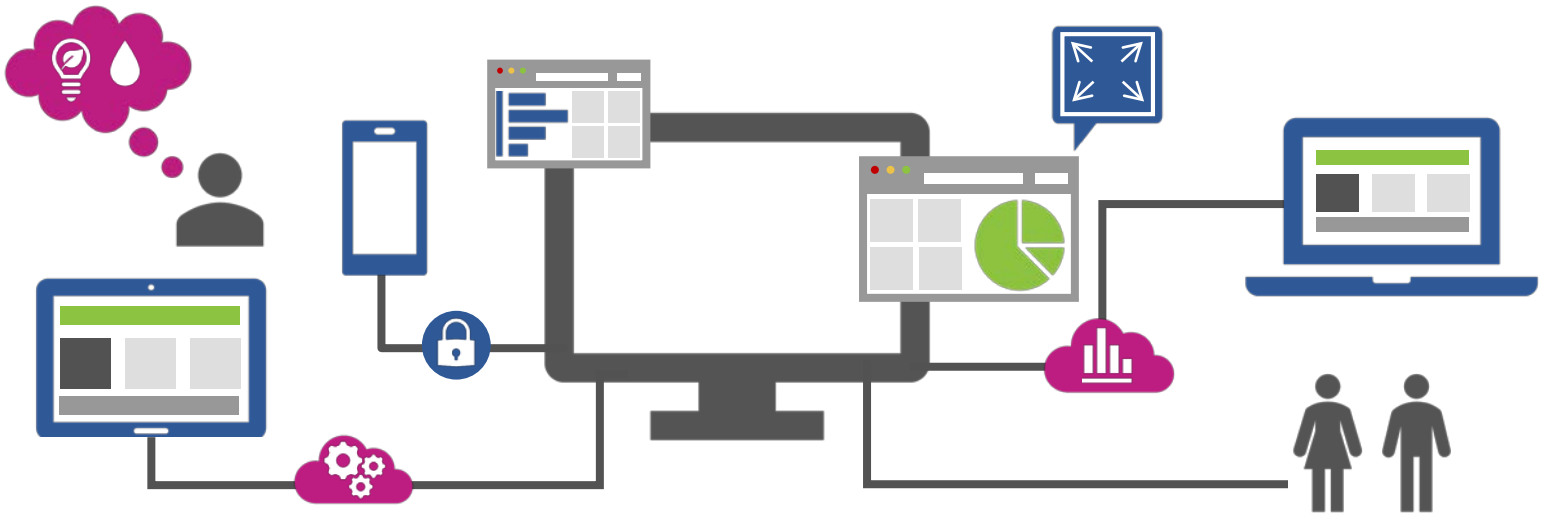

A-TEK is a leading provider of facilities management and optimization solutions. We support government clients by managing facility information and compliance requirements.

Whether our clients' orientation is science or national security, our experts understand the underlying mission, and provide a suite of solutions to support their facility management objectives.

Our lifecycle methodology clarifies our client's pain points and provides a go-forward strategy for continual improvement. We accomplish this through collaboration following a logical progression of evaluation, insight, alignment, and enablement.

Our proven framework and a team of experts provide the innovation and management needed to optimize government facilities and workspace resources.

**A-TEK solutions provide the visibility and efficiency to maximize workspace resources.**

**A-TEK offers innovation and the talent needed to optimize government facilities.**

1

### Expertise

Personnel with advanced skills in the areas of facilities data management, systems integration, and business process re-engineering.

### Space & Asset Utilization

Our solutions provide real time intelligence to allocate space and assess the performance of facilities infrastructure.

2

### Technology

Business intelligence and IWMS tools that maximizes the usefulness of facilities resources, assets and services.

### Utilities & Services Monitoring

We help our government clients track and monitor the usage of energy, water and other facilities services.

3

### Methodology

Lifecycle approach for managing and optimizing facilities management platforms and programs.

### Data Management & Reporting

Our integrated solutions perform analysis and provide visualizations for capital project planning, budgeting and compliance reports.
